the over your neet or pork, to remain the usual time, say four or tive weeks. The meat must be well covered with pickle, and should not be put down for at least two days after killing, uaring which time a should be slightly sprinkled with powdered saltpeter, which removes all the surface blook, &c., leaving the meat fresh and clean. Some omit boiling the pickle, and find it to answer well; though the operation of boiling purifies the pickle by throwing off the dirt always to be found in salt and sugar.

The question of deep plowing which we had supposed definitely settled long since, is again being brought forwe had supposed definitely settled long since, is again being brought forward, and the discussions are assuming a very spirited style. Subsoil plows which grow rapidly in layor some years since have almost entirely disappeared though falth in deep plowing has taken a stronger hold than ever. Of course the depth of plowing should be in proportion to the depth of soil. It will not do to plow have seened with the proceeds. He is supposed to have gone to South electron soil js only six. This may be done in soit is only six. This may be done in i the course of time, but not at once.

Let a proper portion of the subsoil be brought to the surface, and exposed to the action of the sun, rain, wind and frest, then add the manores necessary to render it in the.

By pursing this plan for successive years, a fertile soil can be made—one that will resist the effects of severe drought, and be fitted also for the successful entity at one of the suns of the sunser cessful entity at one of the sunser cessful entity at one of the sunser of the subsoil become thorought by intermixed with the soil of the surface, which in consequence of of repeated shallow plawings has been depleted by the sunser of the ameiorating influences of the white in the order that the nowly turned up subsoil, may be subjected to the ameiorating influences of the white it the is done, it will be found that good crops cannot be produced only an within fifteen minutes in locally and the province of the subsoil become thorough for the subsoil of the surface, which in consequence of of repeated shallow plawings has been depleted of the maniferating influences of the white it is consequence of of repeated shallow plawings has been depleted by this method, the plowing should be done in the fall, in order that the nowly turned up subsoil, may be subjected to the ameiorating influences of the white if the ameiorating influences of the white if the subsoil, may be subjected to the ameiorating influences of the white if the subsoil, may be subjected to the ameiorating influences of the white if the subsoil, it will be found that good crops cannot be produced only the other whom it and the province of the subsoil of the subsoil of the subsoil of the subsoil of the will be found that good crops cannot be produced only the other whom it and the province of the subsoil of the subs good crops cannot be produced unless there is a liberal application of manare. Plow deep and manure generously, and you will have a good sol and a bountiful yield. LOOK TO THE WINTER WHEAT.

It is care to find a field of winter wheat on which there are not low spots where the water lies on the surface. Much might have been done to prevent this by "farrowing out" as soon as the grala was sown. Now i must be done with the hoc and spado operation, but not one-tenth of what this matter. It is by no means a suban outlet and make the water followometed to find how much full there is, even on land that is apparently on a dead level. Try II and you will save wheat enough to buy a first-class agticultural library.

GREASING WAGONS.

But few people are aware that they do wagons and carriages more injury by greening too plentifully than any other way. A well-made wheel will endure common wear from ten to twenty-five years, if care is taken to use the right kind and proper amount of grease; but, if this matter is not attembed to, they will to used up in five or six years. Land should never be used on a wagon; for it will penetrate the hub, and work its way out around The tenons of the spokes, and spoll the wheel. Tallow is the best lubricator tor wood axletrees, and easter oil for

Just grease enough should be applied to the spindle of a wagon to give it a light coating. This is better than there; for the surplus put on will work out at the ends, and be forced by the should be been supplied by the spindle beautiful to the surplus put on will work out at the ends, and be forced by the shoulder-bands and nut-washers into the hub around the outside of th Loxes,
To oil an axletree, first wipe th

spirits of turpentine, and then apply lew drops of easter oil near the should er and cod. One tenspoonful is suffi cant for the whole.

FOOD FOR THE FAT.

Rall's Journal of Health says not long ago a gentleman of threeseoro. who had scarcely been sick in his life, thought he was too fleshy, and became to Bantamize. He succeded famously and boasted to his friends that he ha got rid of ten pounds in a few weeks. A little later be was attacked with a painful and dangerous malady, from which he has been suffering for more them a year. If a man can sleep soundly, has a

good appetite, with no unpleasant rominders after meals, the bodily habita taing regular every day, he had better let himself alone, whether he is as big n- a hogshead or as thin and dry as a fence rail.

Several cases of Bright's diseas have been reported by medical men of reputation as a direct result of practicing Bantam's plan of getting lean. 11d of fut is to work it off. This may be aided by eating food which contains a large amount of nitrogen and a small annuant of carbon. Nitrogen and a small annuant of carbon. amount of carbon. Nitrogenous food is that which gives strength power to 1870. work, as lean meats. Carbonaccous londs are those which make fat, such ga cheese, potatoes, lice, corn, beaus peas, taploca, arrow root, corn starch milk, sugar, syrup, and all oily and lat food. Raw fruits and berries lorgety eaten are great aids to reducing weight. But after all, the great lehance should be on exercise and work in the open air. Barelay, the great English pedestrian, who performed greater leats than Weston, lost len pot ads in two or three days' walking, and was never the worse for it.

A young man charged with being lazy was asked if he took it from his father. "I think not," was the roply; father. "I think not," was the ropty; A GENTS WANTED-(225 A MONTH)-by "father's got all the laziness he ever the confidence in the laziness he ever the laziness h
